-but here it is -the ideal car -at the ideal price

Things that were impossible yesterday are today's accomplished facts.

Somewhere in the world someone with special knowledge, special experience, special equipment, gets ready and then starts the world by accomplishing the seemingly impossible.

Almost everyone said that a complete automobile of beautiful design, fine finish, the ideal small, light, economical car, built with quality materials and absolutely completely equipped, could not be built to sell for \$615.

And but for Overland special knowledge, special experience and special equipment, it probably would still be one of the impossibilities instead of an accomplished fact.

Probably no other organization in the world can produce the quality and efficiency equal of this car to sell at anywhere near so low a price.

Certain it is that no other organization is doing so.

And no other car ever produced seems so exactly to suit the requirements of so varied a lot of people.

People of wealth, people of modest means—

People of long automobile experience—

People who never before owned a car—

All find in the small, light \$615 Overland their ideal car.

It has the beauty, comforts, conveniences, power and complete equipment which everyone wants.

Yet it is inexpensive to buy and economical to operate.

See the Overland dealer and get acquainted with this car.

But act now, as this car stands alone and the rush to own them is amazing—delayed action is almost sure to mean a long wait for delivery.
